Summary

AI/ML Engineer with experience building end-to-end **Generative AI** applications, **Retrieval-Augmented Generation (RAG)** systems, and scalable backend services using **Python**, **FastAPI**, **PostgreSQL**, and modern **Large Language Models**. Passionate about backend engineering, AI infrastructure, and contributing to open-source AI projects.

Education

Maharaja Agrasen Institute of Technology (GGSIPU Affiliated), New Delhi	2022 – 2026
B.Tech in Information Technology and Engineering	CGPA: 8.05

Experience

Salescode.ai, Gurugram	Sept 2025 – Present
Software Engineer	
- Own production issue investigation for a five-application platform — reproducing customer-reported failures, validating backend data with SQL, inspecting REST API responses and driving root-cause analysis with developers across 100+ defects per release. - Engineered a configuration-driven automation framework (Playwright) that runs one suite across multiple client deployments, scaling to 500+ automated checks and removing per-client maintenance. - Replaced the manual release cycle with Jenkins-scheduled CI runs and supporting Python utilities, delivering a daily product health signal to engineering leadership without manual effort. - Automated end-to-end flows for a native Flutter mobile app across authentication, dashboard and checkout journeys on real devices and emulators, eliminating failures caused by asynchronous UI timing.	
DRDO (SAG), New Delhi [Certificate]	June 2024 – Aug 2024
Research Intern	
Researched automated vulnerability detection using fuzzing, evaluating tools that generate edge-case inputs at scale, and presented findings in technical reports.	

Projects

Atlas AI – AI Knowledge Assistant Python, FastAPI, PostgreSQL, ChromaDB, Gemini, React [GitHub]	July 2026
- Built a full-stack AI knowledge assistant enabling document-based question answering using Retrieval-Augmented Generation (RAG). - Implemented hybrid semantic and keyword search with secure JWT authentication, streaming responses, and support for PDF, Word, PowerPoint, Excel, and CSV documents. - Improved response reliability by evaluating retrieval quality and reducing hallucinations through benchmark-driven optimization.	
Jira AI Assistant – LLM-Powered Engineering Assistant Python, Jira REST API, LLM APIs [GitHub]	June 2026
- Built an AI-powered assistant that transforms unstructured engineering notes into structured Jira tasks using Large Language Models and prompt engineering. - Integrated Jira REST APIs with intelligent model fallback to automate engineering workflows across multiple LLM providers. - Generated structured Excel reports to streamline project tracking and engineering documentation.	
ColdReach – AI Outreach Agent Python, Groq, Gmail API, OAuth [GitHub]	June 2026
- Built an AI-powered outreach agent that generates personalized emails using Large Language Models. - Integrated Gmail API with OAuth for secure email delivery and implemented human approval before sending. - Added delivery tracking and duplicate prevention to ensure reliable outreach campaigns.	

Open Source Contributions

Promptfoo — 22k-star LLM Evaluation Framework TypeScript	2026
Contributed to improving LLM safety evaluation by fixing a refusal-detection edge case and adding regression tests.	
Opik — Comet ML LLM Evaluation Platform Python	2026
Improved evaluation reliability by restoring configurable ChrF metric settings and validating the fix with regression tests.	
Arize Phoenix — LLM Observability & Evaluation Platform Python	2026
Improved LLM observability by fixing silent data loss in span attribute loading and adding regression test coverage.	

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL
AI & Machine Learning: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Prompt Engineering, Embeddings, Semantic Search, Vector Databases, Model Evaluation
Generative AI: Gemini, Anthropic, Groq, OpenRouter
Backend: FastAPI, REST APIs, SQLAlchemy, Pydantic, JWT Authentication, Asynchronous Python
Databases: PostgreSQL, MySQL, ChromaDB
Frontend & Tools: React, Tailwind CSS, Git, GitHub, Docker, Jira
