

Hiya Arora

AI/ML Engineer | GenAI Engineer | Backend Software Engineer
hiyaarora08@gmail.com | +91 9466326125 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

Maharaja Agrasen Institute of Technology (GGSIPU Affiliated), New Delhi
B.Tech in Information Technology and Engineering

2022 – 2026
CGPA: 8.05

Experience

Salescode.ai, Gurugram

Sept 2025 – Present

Software Engineer

- **Backend & API Workflows:** Worked with Python, SQL, REST APIs, and application integrations across a multi-application platform, resolving **100+ production issues per release**.
- **Automation & CI/CD:** Engineered Python automation and Jenkins-scheduled CI workflows, raising automation coverage from **30% to 90%** across client deployments with **500+ automated checks**.
- **SCAI Agent Workflows:** Evaluated AI agent workflows handling **1000+ daily voice interactions** for FMCG clients including Coca-Cola, ITC, and P&G, focusing on accuracy and reliability.
- **RAG Infrastructure:** Worked on RAG pipelines using embedding models and PGVector for context-aware, low-latency AI responses.

DRDO (SAG), New Delhi

June 2024 – Aug 2024

Research Intern

- **AI/ML Research:** Studied Artificial Neural Networks (ANNs) for multi-class image classification, implementing digit recognition on the MNIST dataset with preprocessing and normalization.
- **Deep Learning Research:** Worked on Convolutional Neural Networks (CNNs) for image classification, studying convolution, pooling, batch-based training, and model evaluation.
- **Model Optimization:** Analyzed overfitting and generalization using training/validation performance, exploring dropout and batch normalization.

Projects

Atlas AI – RAG & Knowledge Retrieval Platform | Python, FastAPI, PostgreSQL, ChromaDB [\[GitHub\]](#)

July 2026

- Built a full-stack AI knowledge assistant using **FastAPI** and **PostgreSQL** for document-based question answering through **RAG**.
- Implemented embedding-based semantic search, vector databases, and hybrid retrieval across PDF, Word, PowerPoint, Excel, and CSV formats.
- Deployed the application on **AWS** using **Docker** and **CI/CD**, configuring a production environment for reliable and scalable AI inference.

Multi-Agent Research Assistant | Python, LangChain, LLMs [\[GitHub\]](#)

2026

- Built a multi-agent research workflow using **LangChain** and LLMs with specialized search, research, writer, and critic agents.
- Integrated web search and scraping tools with shared state to retrieve and synthesize information from external sources.
- Implemented iterative refinement to evaluate agent outputs and generate structured research reports.

Jira AI Assistant | Python, LLMs, REST APIs [\[GitHub\]](#)

June 2026

- Integrated **Jira REST APIs** and LLMs to convert unstructured engineering notes into structured Jira tasks.
- Implemented API authentication, structured data processing, prompt engineering, and multi-model fallback for reliable workflow automation.
- Automated structured Excel reporting to streamline issue tracking and engineering workflows.

Open Source: Contributed to open-source AI/LLM projects including **Promptfoo**, **Opik**, and **Arize Phoenix**, addressing LLM evaluation, safety, metric configuration, and observability.

Technical Skills

AI/LLM: Generative AI, LLMs, RAG, LangChain, AI Agents, Vector Databases, Embeddings, Semantic Search, Prompt Engineering, LLM Evaluation, NLP

Deep Learning: Artificial Neural Networks (ANNs), Convolutional Neural Networks (CNNs), TensorFlow, Keras, Model Evaluation

Languages: Python, Java, TypeScript, JavaScript, SQL

Backend & Data: FastAPI, Flask, REST APIs, Pydantic, AsyncIO, PostgreSQL, MySQL, MongoDB

Frontend & Tools: React, Tailwind CSS, Streamlit, Git, GitHub, Jenkins, CI/CD, Docker, AWS

APIs & Integrations: Jira REST API, Gmail API, Google Sheets API, Google OAuth, Gemini API
